

ASRS Tray

Features & Benefits

- High-pressure injection molded using high-density polyethylene resin for superior durability and performance
- Steel reinforcements provide support and stability by equally distributing load throughout tray
- Optimal footprint with ergonomic handles for manual transport and guide rails for automation tooling engagement
- Perimeter lip helps secure and protect product against damage and unnecessary replacement costs
- Highly nestable design saves space when empty in warehouse
- Compatible with most automated storage and retrieval systems

Options

- Various colors available to promote brand awareness
- Molded-in logos available for customer specific branding
- RFID and barcode technology available for seamless system integration
- Separate compatible tub available for enhanced storage and versatility
