Features & Benefits

- IGBC Certified Bear Resistant
- ANSI Certified, with all standard components, to limit risk and liability for both the purchaser and end user; Improved cart stability vs. competing FA and SA options
- "Ready to Roll" Design – lids, locks, catch bars, and body are fully assembled on delivery; One-piece blow molded snap on (BMSO) wheels with integrated spacers takes only seconds to attach for deployment
- Textured body offers optimum gripping surface for fully-automated collection
- Barcode & Serial Number imprinted to facilitate A&D distribution and manual inventory control and work order tracking; completely visible/scannable, even when carts are stacked
- External, enclosed catch bar allows for the cart to have a smooth inside without holes to mitigate leaking and seepage for high-liquid applications.
- Safe and Strong – Robust design is lightweight, making it easy and safe for humans to maneuver, yet extremely difficult for bears to compromise
- Limited exposed metal – mitigates potential end-user injuries, reduces container damage in-transit/in-field, and effectively prevents bears from accessing containers by limiting options for access via biting/clawing/bending/twisting
- Designed with all users in mind – ergonomic locking mechanism allows container to easily be opened by humans with one hand, but prevents bears from opening with claws, paws, and teeth
- Carts are shipped with lids already attached, reducing assembly time
- Barcodes and serial numbers are clearly visible when containers are stacked for ease in inventory management
- RFID Tag Enabled option provides innovative asset and participation tracking programs powered by Vision®
