

Lean, Green Produce Machine

# Reducing Our Carbon Fruitprint

OK Produce is delivering a fresh revolution by offering high-quality food at affordable prices. Their goal is to provide fresh fruits and vegetables that are produced, handled, and distributed in an environmentally responsible way from field to store, including using more sustainable packaging. By building valued partnerships with vendors that share the same passion, values, and quality standards, OK Produce trusted Rehrig Pacific to provide nestable pallets for their shipments. Rehrig Pacific's 100% recyclable pallets enabled superior product freshness, allowing produce to be moved faster, while also maintaining OK Produce's strict food safety and sanitation guidelines with their flow-through design for ease of cleaning and draining. Not only did Rehrig Pacific enable them to become more sustainable, but they also helped save the business a significant amount in fuel and other labor costs.

40 x 48 Nestable Pallet

## Testimonial

“Plastic pallets are lighter and safer to handle while taking up much less space. The program also provides a positive return on investment, while making a dramatic, positive impact on the planet.”
