

Versatility. Power. Agility. Made to move.

The Rehrig Pacific Hybrid Sled

Key Features:

- Designed for Rehrig Pacific 29" x 42" pallet configuration
- Drive system powered by hub motors
- Electro-hydraulic pump
- Operated manually or powered
- Lightweight lithium-ion battery with toolless quick swapping
- Dual brake systems
- Delivery IoT Capability

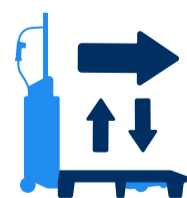

The Hybrid Sled from Rehrig Pacific is a game-changer for food distribution! This innovative sled is designed to seamlessly transport goods from truck to store, boosting productivity and ensuring operator safety with easy handling. Despite its lightweight and compact design, the Hybrid Sled can move up to 1500 lbs. and can be operated manually or powered, adapting effortlessly to any situation, from navigating narrow spaces to overcoming obstacles and challenging weather conditions.

By enabling quick in-and-out deliveries at stores with compact or narrow space layouts, and eliminating the need for down-stacking, this sled delivers significant cost savings, improves safety and driver experience, resulting in better driver retention.

Integrated smart capabilities in your Hybrid sled unlock route-by-route and store-by-store analytics, monitor your lifts in the field, and track your assets to reduce loss.
