

Introducing our new organics material collection station

The numbers are in, organic food waste is one of the largest polluters in our landfills. And one of the easiest to solve. New legislation in California and across the country requires residents and businesses to separate food waste into bins that can be properly diverted and treated.

Rehrig Pacific is leading the way by providing an easy-to-use ergonomic 1-yard commercial container that is also strong, durable, and highly maneuverable. Perfect for restaurants, grocery stores, school, and sporting venues where food waste is abundant.

Coming soon in late 2022. Contact Rehrig Pacific today to learn more.

Benefits and Features

- First of its kind twin body design protects the container from bulging or deforming under load
- All-plastic design keeps this cart protected from corrosive organic materials
- Light-weight compared to steel container alternatives reduces risk of push/pull injuries
- Replaceable plastic sleeves for easy maintenance
- Smooth inner body has zero trap points for material to get stuck in helping to reduce odor
- Twin body design protects the container from bulging or deforming under load
- Ergonomic lid height allows user to safely dump smaller container into it without lifting load over shoulder height
- Sub-lid has a 160 degree hold open feature to allow easy & ergonomic dumping of smaller containers into it

Specs

- Volume = 1 Yard
- Minimal Wall Stock = 0.25"
- Estimated Total Plastic Weight = 250 lbs.
- Load rating = 1000 lbs. per yard
- 53' Open Flat bed Trailer load = 36 units (TBD)
